DESIGN - MANUFACTURING - DISTRIBUTION

OUR BUSINESS

SHEET METALWORK PIPEWORK

STANDARD PARTS & CUSTOM DESIGN

Our expertise when it comes to sheet metalwork, pipework, and metal parts (fine thicknesses of 15/10 to 20/10) (thicknesses of up to 8mm) means we are capable of producing large dimensions with diameters between 50mm up to 2m.

We design and manufacture a range of different parts, including tins, ducts, pipe elbows, diversions, hoppers, pipes, cyclones and sleeve clamps.

These parts are used by flourmills, cereal producers, cooperatives, sawmills and in a range of other industries. Our products can be delivered untreated, painted, in stainless steel or with either hot or cold galvanisation.

DUST AND PRODUCTION WASTE SUCTION

Dust is collected as close as possible to its source.

AIR VENTILATION

Pollutant gas, smoke and steam are collected in order to prevent them from spreading.

BULK HANDLING

We deliver installations for transporting, processing, storing and mixing bulk materials.

OUR BUSINESS ENVIRONMENT

STANDARD PARTS & CUSTOM DESIGN

All our waste bins and ashtray bins are designed and manufactured in accordance with the applicable regulations, with a range of products targeted at local authorities, hotels, restaurants, the service sector and industry: metal bag supports, waste bins made from metal or recycled plastic, outdoor ashtray bins, street furniture, etc.

In 2017, we created PolyAl by Guéry®, a range of products made using recycled food packaging, in an attempt to limit our environmental impact.

DUST BINS

Waste receptacles, bi/tri-flux bins, selective sorting, custom models.

ASHTRAY BINS

A wide range of functional cigarette bins.

OUTDOOR FURNITURE

For all your outdoor furniture needs.

A CLOSER LOOK AT

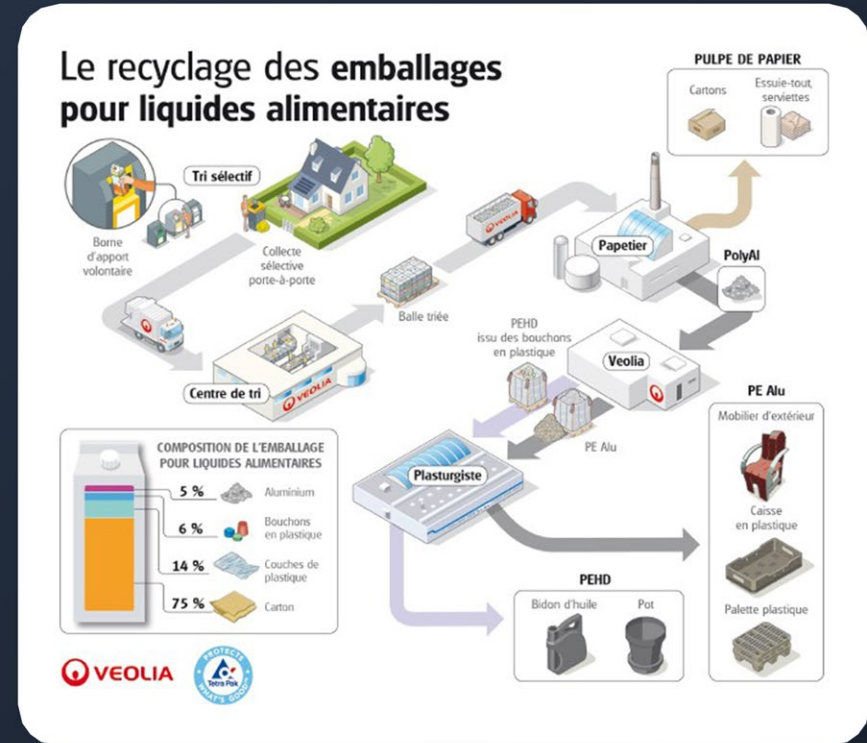

THE AIM: TO REDUCE OUR ENVIRONMENTAL IMPACT

Launched in 2017, the products in this outdoor furniture range are made using recycled food packaging such Tetra Pack*. The process is quite simple and begins with empty packages being mixed with water. While the pulp is being mixed, the fibres absorb any humidity and the plastic on the laminated layer comes away.

Mechanical filtering is then used in order to separate the various materials, producing:

- recycled paper fibres, a high quality raw material for the paper industry
- plastic (polyethylene) + aluminium => PolyAl

One of our partners, such as Veolia, for example, then works the PolyAl in order to mould it into shape. Guéry entered into a partnership with the company Urban'Ext in order to design and create a range of environmentally-friendly street furniture that is resistant to both adverse weather and UV rays.

PICNIC TABLE AND BENCHES

DUSTBINS

OUR BUSINESS

INDUSTRIAL MOULDS & EQUIPMENT

FOR BAKERIES, PATISSERIES
AND ALL CATERING ACTIVITIES

STANDARD PARTS & CUSTOM DESIGN

We manufacture and distribute materials for use in bakeries, patisseries and all catering activities.

A range of different materials are available (steel, blue steel, tinplate, aluminised steel, Resist+, stainless steel), supplied either untreated or with a non-stick coating.

INDUSTRIAL MOULDS

Development, prototyping and serial production.

EQUIPMENT

Design and manufacturing of "standard" products for bakeries, patisseries and all catering activities.

MATERIALS & UTENSILS

Wholesale of products : functional ranges and utensils.

Industrial moulds : **Mr.Olivier CARON**
Material & equipment: **Ms.Pascale NICOLAS**
